

GREENCHECK

GreenCheck uses a multi-stage process to achieve optimal performance in environmental management and sustainability.

Proven Platform

GreenCheck was developed by RiskCheck Inc., one of Canada's leading health, safety and environmental risk companies, as a user-friendly online tool for sustainable property management. With hundreds of properties using the program, GreenCheck has become a trusted name in the industry

Customized Portfolio Reporting

GreenCheck offers assistance from expert staff in sustainability management planning, and provides in-depth portfolio reporting for both quantitative AND qualitative metrics. Each client's program is customized based on individual sustainability program needs. Detailed analysis establishes benchmarks with quantifiable results at a level of intensity that works for each organization.

Building Certification Consulting

GreenCheck provides detailed building certification consulting for BOMA BEST and LEED for Existing Buildings: Operations + Maintenance by qualified LEED Accredited Professionals.

Once certified, whether by GreenCheck or an outside firm, GreenCheck's LEED EB: O&M Maintenance Tool puts certifications back in the property's hands. Through regular monitoring and assistance, buildings greatly reduce re-certification costs without being overwhelmed with additional work.

Other Submissions

GreenCheck can collect, compile and report data for a wide array of programs and awards. Some include GRESB, REALpac and Race to Reduce.
