

LEED Consulting Services

GreenCheck provides full consulting and advisory support for property managers aiming to achieve LEED O+M Building Operations and Maintenance certification or to renew their facility's existing certification.

LEED ENGAGEMENT

GreenCheck works with property teams to set LEED O+M Building Operations and Maintenance certification goals by reviewing available credits and determining which can be achieved in the project timeline. Our sustainability consultants will assist in coordination and communication, to ensure that all applicable parties at the property level are aware of LEED building performance and documentation requirements to meet the set certification goals.

GreenCheck's LEED Engagement services include leading project strategy sessions for property teams at the beginning of projects, as well as progress meetings throughout the performance period to ensure certification milestones are being met.

CREDIT DOCUMENTATION COMPLETION & REVIEW

GreenCheck will assist in the registration of your property's LEED Online profile, where your project certification information and data will be managed and submitted.

Our team will review property credit data and documentation on an ongoing basis to ensure that LEED minimum program requirements (MPRs) and credit requirements are met. Any further actions required to meet LEED requirements will be identified and communicated.

A final review of all LEED documentation and data is performed before submitting for certification.

AUDITS

GreenCheck can perform the following audits and assessments in order to comply with LEED O+M Building Operations and Maintenance Prerequisite and Credit Requirements.

Energy Audits

Aligned with the ASHRAE Level 1 or Level 2 requirements to fulfill the requirements of LEED O+M Building Operations and Maintenance Energy and Atmosphere Prerequisites and Credits.

Waste Audits

Waste Audits can be performed to ensure waste diversion requirements are being met, to align with LEED O+M Building Operations and Maintenance Materials and Resources Prerequisites and Credits.

Transportation Survey

Transportation surveys to identify the rate of alternative transportation usage can be performed, to align with LEED O+M Building Operations and Maintenance Alternative Transportation Credits.
